Data:
How to Read It
How to Use It

Printed with permission from the following National Science Foundation Long Term Ecological Research sites involved in the Agrarian Lands in Transition (http://ces.asu.edu/agtrans/) grant (#DEB-0216560): CAP, CWT, HFR, KBS, KNZ, SGS
List what biomes are found in each of the following states:
Arizona, Colorado, Kansas, North Carolina, Massachusetts, Michigan
This bar graph shows the average precipitation in six major biomes. What would be an appropriate title for this graph?
In Michigan, what is the average precipitation (approximate) during the summer months (June, July, August)?

![Bar graph showing precipitation (mm) for Kellogg Biological Station, Michigan for the months of January to November.](image)
In comparing the precipitation and temperatures, summarize what visitors might expect in the winter versus the summer in Michigan.
