Explore the Future of Phoenix!

What does the future hold for Phoenix? Which new technologies matter most for you and your community? How would you direct science and technology?

Join Arizona State University researchers in discovering nanotechnology and thinking about what it might mean for Phoenix. As science and technology progress, your voice is important in shaping new developments.

- Experience nanotechnology through a guided walking tour of the city.
- Talk with scientists and engineers.
- Photograph the past, present, and future of the city.
- Share your opinions about desirable futures.

Participation involves attending three gatherings:
- Monday November 5\textsuperscript{th} (5pm-8pm)
- Saturday December 1\textsuperscript{st} (9am-5pm)
- Monday December 3\textsuperscript{rd} (5pm-8pm)

For further information, and to be selected to participate, please email: futurescape@asu.edu or apply at http://svy.mk/PLEwR5

You must be 18 years old to volunteer for this research.

CNS-ASU research, education, and outreach activities are supported by the National Science Foundation under cooperative agreement #0937591.
