School of Sustainability Residential Community
The School of Sustainability Residential Community, located within Adelphi Commons II, provides a welcoming and supportive environment for freshmen as they transition into university life, as well as helps in the development of the skills needed for academic and personal success. Sustainability students learn to access the many resources available to them through the School of Sustainability and ASU – through residential programming, intentional experiences and opportunities, and targeted support. Upper-class and transfer School of Sustainability students also have the opportunity to reside within the community as part of the School of Sustainability Undergraduate Academy.

Students who earn a bachelor’s degree in sustainability are adaptable, able to communicate and learn across a broad range of disciplines, and have critical problem-solving skills.

Why Join?
By joining the community, students will be part of a support system of sustainability-minded friends, faculty, and instructional staff to help them succeed in and out of the classroom.

Benefits include:
- Getting involved in the University’s academic and social life right away
- Feeling a sense of belonging on campus
- Getting to know fellow students who have the same major
- Studying and socializing with classmates that live close by
- Getting to know and interacting informally with faculty on a regular basis
- Learning about campus resources and services that promote success
- Participating in special academic and extracurricular activities, such as:
  - Pizza with the Dean
  - Field trips (or other experiential learning activities)
  - Campus sustainability projects
  - Community gardens

What is Adelphi II Like?
Adelphi Commons II contains six units that offer a variety of amenities that include a large multi-purpose center, common area laundry facilities, and common area kitchens. Nearby Sonora Hall features the Sonora Market convenience store, while nearby dining halls can be found in Hassayampa and Barrett. The residential halls feature suite-style living accommodations for first-time freshmen and private room/shared bath accommodations for upper-class students.

The School of Sustainability Residential Community (SOSRC) is located within unit “S” of Adelphi II. This unit features a student lounge and study area as well as an open courtyard space to achieve a contemporary and fun yet meditative and studious environment for academic and co-curricular activities. This unit also features organic window farms and gardens with composting, which offers the opportunity to study and experience sustainable living concepts. Other amenities include in-residence advising hours, nearby tennis and volleyball courts, basic cable, and air conditioning.
