Arizona State University
School of Sustainability
P.O. Box 872511
Tempe, AZ 85287-2511

Mission
The School of Sustainability brings together multiple disciplines and leaders to create and share knowledge, train a new generation of scholars and practitioners, and develop practical solutions to some of the most pressing environmental, economic and social challenges of sustainability, especially as they relate to urban areas.

ASU Sustainability in the News
“As a $315 billion sector of the economy – and one that will train future leaders – higher education has a special responsibility to encourage environmental stewardship. Arizona State has just opened an entire School of Sustainability…”
Newsweek Online, August 20-27, 2007

“One of the best examples of the ivory tower’s effort to tread lightly on the land is Arizona State University.”
Christian Science Monitor, December 19, 2006

“[ASU] puts strong precedence on three things: high-quality interdisciplinary research; access for large numbers of students from Phoenix’s racially and socially diverse population; and relevance to the needs of the city and the region.”
Nature, April 26, 2007

Making a difference
Transdisciplinary education at the nation’s first School of Sustainability
