Name:

1. List your Primary and Interconnected Food System Components, and describe how they are related.
   - 
   - 
   - 
   - 

2. How was each Food System Component impacted by one change to the system? Why?
   - 
   - 
   - 
   - 

3. Identify a change in the food system that would result in a more sustainable future.

4. Refer back to your initial diagram/model for the production of a Snickers bar. What components are missing? What do you think should be included now?

5. Reflect on ONE of the following Questions: What surprised you about this exercise? How do you think differently about food now? What changes can you make?
